*Solutions for the Real World*

PDSA, Inc.  
Developer Utilities

This set of tools is specifically designed for the .NET programmer. Our Computer Cleaner takes care of all the little left-overs that Visual Studio leaves around. Our Property Builder can create groups of properties much quicker than the built-in snippets. Our Project Cleaner helps get rid of extra files and folders in your Visual Studio project.

## Business Value

These tools will make Visual Studio and .NET programmer more productive. Cleaning up after Visual Studio makes your machine much faster and keeps those little “unexplained” bugs from creeping up in Visual Studio. The Property Builder makes creating properties much faster than within Visual Studio. Manually removing source control and folders that are no longer needed in a project can be time consuming, the Project Cleaner does it in a matter of seconds.

## Special Features

This application takes advantage of animation for a very nice user interface effect. It uses background processing to allow users to cancel any of the processes. A unique menu system is used to keep all tools easy to access. A licensing system is used to enforce a 60-day trial mode.

### Technology Used

Microsoft Visual Studio

Windows Presentation Foundation (WPF)

C#

PDSA .NET Productivity Framework

Haystack Code Generator

## Contact Information

For more information on this proposal, please contact either Paul D. Sheriff or Michael Krasowski at PDSA.
