Greenback to School - Website

Greenback to School

Help Your Child - Help Your School

Greenback to School provides you with the ability to buy school supplies for your child and give back to your child's school at the same time.

Greenback to School provides a simple, easy-to-use web experience for families to purchase school supplies at a reasonable price, and forward the proceeds to the school of their children or school(s) of their choice. Financial transparency is one of the key elements we strive for, to make sure our users will never have to second guess where the money is going.

Greenback to School Website

The Greenback to School website provides teachers with the ability to create shopping lists for each classroom at their school. Parents can then go online and purchase school supplies for their children, and the proceeds go to the school.

Shopping List Builder

A teacher is able to visit the website, pick her state, city and school and enter the name or grade of the classroom and then start building a shopping list of the items needed for each student in the class. When building the shopping list, the teacher is able to select from Greenback to School's inventory of school supplies and tailor the list to the needs of the

classroom. Once the list has been completed, the teacher may then publish the list and it becomes available for parents to purchase the items needed for their students.

Shopping Cart and Checkout

A parent is able to visit the website, pick her state, city, school and the name or grade of the classroom and then add the items from the classroom shopping list to his cart. If the parent has multiple students, he may add the items for each of his students. If there are other items needed, the parent may also add items from Greenback to School's inventory of school supplies. Once the parent is satisfied with his choices, he starts the checkout process, completes payment through PayPal checkout and can then receive an email confirmation of his order.

Business Value

The Greenback to School provides a simple mechanism for teachers to identify what school supplies are needed for their classroom and for parents to go online and shop for those items, all while raising additional funds to support their school.
