

Are your developers holding your development back?

Our Skills Assessment Review is an interview with each of your developers to gauge each one's effectiveness in the role in which they are currently placed. We outline each role you need in your shop and where each of your people should be placed.

Why Choose PDSA...

PDSA develops custom business applications specializing in web and mobile technologies, enabling workflow management, operational efficiencies, and effective information management.

PDSA was founded in 1991 and since has successfully delivered advanced custom application software to a wide range of customers and diverse industries. With a team of dedicated experts, PDSA delivers cost effective solutions, on-time and on-budget using innovative tools and processes to better manage today's complex and competitive environment.

Call us toll-free at 888-899-PDSA (7372) and ask for Michael Krasowski or David Lefort. Email us at info@pdsa.com.

Without the Right Skills Your Software Projects Can Suffer

The PDSA Skills Assessment Review identifies areas where your developers, business analysts and project managers require additional training. We help you identify the gaps in your IT staff's knowledge in relation to your business goals. We then recommend the training, mentoring or other courses of action to help your team build the necessary skills to meet your goals.

- **Findings:** Are your employees skills what are needed to take your company into the future?
- **Reasons:** What are the skills that are lacking?
- **Recommendations:** We outline a plan for improving skills.
- **Remediation:** For an additional fee, PDSA can help you implement the recommendations.
- **Here is a very small sample of our checklist:**
 - √ .NET Skills
 - √ Project Management Skills
 - √ Inter-Personal Skills
 - √ Database Skills
 - √ Requirements Gathering
 - √ Organization Skills

.NET Technical Skills

Having the right .NET technical skills is critical for a developer today. Our assessment test will give you an idea on where each employee stacks up to the industry standard.

Database Skills

Every developer needs to be able to work with a database. Developers should know how to performance tune their SQL queries, and create basic stored procedures. Our assessment will determine their skills in these areas.

Project Management Skills

Identifying key requirements and developing project estimates are two fundamental skills each IT employee should have. We help you identify those employees that need more guidance in these areas.
