

# Web and Data Security

## Concerned About Your Website and Data Security?

Companies are being held responsible for breaches in security. Make sure you are not open to this legal risk. If you need answers to these questions...

- Is my website open to attack?
- Did my website designer secure my website correctly?
- Is the sensitive data in my database such as passwords and credit cards stored securely?
- Am I in compliance with HIPAA, SOX, PCI?

PDSA can help you answer all of these questions and more.

We have successfully secured websites and databases for over 15 years. We can evaluate how your data is stored and ensure you are following the industry best practices.

Make Your Website
